

I came to Wellness Natural Health Centre in 2003 after being diagnosed with melanoma in my left eye. I was also concerned about repeat cancer and my failing health having looked after my incapacitated husband for many years.

After a thorough examination and series of tests, I began taking supplements and homeopathic drainage, which agreed with me and did not interfere with my prescriptions.

My health has improved greatly and each morning, I feel ready to start the day.

I have recommended Susan to several of my friends and I enjoy listening to Susan when she speaks about ladies health issues on television.
