

Susan came highly recommended to me by one of my daughters in 2001. At the time, I was experiencing difficulty with my mental and physical health. Both were in decline.

In the past four years, Susan has helped me through a number of crises. She taught me how to deal with negative thoughts and repair my body so I can walk and move my arms without pain. What a blessing.

Susan has been a "*Godsend*" to me.

Thank you,

E. Petric
